Ideas

Skill focus: the relevance, quantity, quality, selection and elaboration of ideas for the topic

Definition

- **Quality of ideas**

Simple ideas are related to the personal, immediate world of the writer (concrete, predictable, familiar, personal and/or close to writer's experience).
Complex ideas may involve generalisation, abstraction and reflection on the wider world and groups of people.

- **Selection of ideas**

The deliberate choice of relevant ideas or subject matter to engage and influence the reader.

- **Elaboration of ideas**

Elaboration should be relevant and may be given by providing background information or factual detail, describing, explaining, providing evidence, analysing, or evaluating.

Structure and language

Skill focus: the presence and development of structural and language features appropriate to the specified purpose

Definition

- **Structural features**

The component parts that are typically associated with a text written for a particular purpose. For example, when narrating, structural features may include an orientation to the context (place, time and participants), a series of events/actions, a problem or complication, and a resolution.

- **Language features**

The language patterns that are typically associated with a text written for a particular purpose. These include selection of tense, tone, text connectives and vocabulary. For example, when narrating, typical language features include use of past tense, connectives denoting time (in order to provide a clear sequence of events), expressive and/or descriptive vocabulary, and dialogue.

Category	R1	R2	R3	R4	R5	R6
Descriptor	Structural features and language features are inappropriate for purpose or absent	Some structural features are appropriate to purpose AND/OR Some language features are appropriate to purpose	Some structural features are appropriate to purpose AND Language features are mostly appropriate to purpose	Structural features are appropriate to purpose and some show development (may be one well-developed element with others less developed) AND Language features are appropriate to purpose	Structural features are appropriate to purpose and are developed and mostly controlled AND Language features are appropriate to purpose and mostly controlled	Structural features and language features are appropriate to purpose, controlled and effective
Notes	See 'Structure and Language Notes' for each prompt for guidance on appropriate structural and language features.

Organisation

Skill focus: the organisation of ideas into a coherent text

Definition

- Coherence**

The way ideas are linked to each other and to the broader context of the writing and/or the wider world, to produce a text that is meaningful to the reader. When the text is coherent, the relationships between ideas are clear and the writing 'flows'. When assessing a text's coherence, look for clear text connectives, consistency of verb tense, and accuracy of referring words (e.g., pronouns) across the text as a whole.

NOTE: The focus is on the text as a whole, rather than on individual sentences.

Category	R1	R2	R3	R4	R5	R6	R7
Descriptor	Ideas are disconnected and/or random OR Text lacks coherence	Text attempts to group and sequence ideas Text has some coherence	Ideas are grouped and sequenced, and text generally flows Text may be brief but coherent	Text shows control over grouping and sequencing of ideas but paragraphs are not used or are indicated incorrectly Text is coherent	Ideas are organised into basic paragraphs	Paragraphs support the development of the text	Paragraphs are deliberately structured to direct the reader Ideas are linked effectively within and across paragraphs
Notes	May be a very short text	Some ideas are grouped spatially, temporally or logically May have random or visual breaks (breaks do not support reader meaning) Text contains like ideas	Errors in or absence of linking words or inconsistencies in tense across text may interrupt flow	Errors in or absence of linking words or inconsistencies in tense across text do not interrupt flow	Paragraphs have minimal development (e.g., one sentence), or some paragraph breaks are not indicated Some paragraphs may be out of sequence May be a minor glitch in flow that does not interfere with meaning	Subheadings, topic sentences and linking words are present and appropriate

Sentence structure

Skill focus: the quality, effectiveness and correctness of sentences

Definition

When judging the correctness of each sentence, consider the following (note: the focus is on the use of correct forms within a sentence, rather than between sentences or paragraphs or across the text as a whole):

- word form (e.g., singular or plural)
- verb tense
- subject–verb agreement
- articles and pronouns
- use of prepositions and relative pronouns to expand sentences
- arrangement of (order of) elaborating phrases and clauses
- missing words
- order of words

NOTE: In order to make assessment of sentence structure more manageable, ‘read in’ missing or incorrect sentence punctuation (including full stops). (Punctuation is assessed separately, in the ‘Punctuation’ element.)

Category	R1	R2	R3	R4	R5	R6
Descriptor	Few correct sentences	Correct sentences are short and may have minimal extension	Correct sentences begin to show variety in structure and type	Most sentences are correct Correct sentences show variety in structure, length and type and have extending phrases and/or clauses OR All sentences are correct but repetitive	Sentences are controlled and show variety in structure, length and type and have extending phrases and/or clauses	Sentences are deliberately crafted to impact and engage
